

## FAA SAVES HW II

### FAA Strategic Sourcing for the Acquisition of Various Equipment and Supplies (SAVES)

## ORDERING GUIDE

Fall 2023

### **Red River Technology LLC**

FAA SAVES HW II Contract Number: 692M15-19-D-00014

Contract Expiration Date: 7/31/2024

#### **What is the SAVES Program?**

The Strategic Sourcing for the Acquisition of Various Equipment and Supplies (SAVES) Program enables FAA to purchase commodity products for less while maintaining or improving the quality of purchases and our suppliers' service levels. There are numerous categories of products available via SAVES, including IT Hardware.

About the SAVES IT Hardware Category in August 2019, the FAA implemented a new, multiple-award SAVES contract vehicle that gives authorized contract holders the opportunity to provide the lowest-cost price on IT Hardware products, including servers, storage systems, network devices, personal computing devices, and peripherals.

#### **Who can order IT Hardware products via the SAVES Program?**

All authorized FAA procurement staff and Department of Transportation authorized to utilize the FAA SAVES HW II Contract.

Information about the SAVES Program and links to the SAVES contract information, purchasing processes and instructions, pricing, contact information, vendor web portal instructions, etc. for each SAVES contract is located on the FAA employee website (FAA only).

As requirements become known, FAA ordering offices may place orders against existing SAVES contracts. Ordering details for each SAVES contract are located on the FAA employee website.

## Which manufacturers can be purchased currently under FAA SAVES HW II?

### Original Equipment Manufacturers (OEMs)

3M	Lacie
45Drives	Lenovo Group Limited
Acer	Lexmark
Adaptec	LG
