When/What	What to expect	Register here:
October 3 | DNA License Deploying the Cisco DNA Center Virtual Appliance	Join us as our experts walk you through the basics of the Cisco DNA Center Virtual Appliance. You will learn what components make up a virtualized deployment of Cisco DNA Center, how devices will communicate with Cisco DNA Center, as well as the steps necessary to deploy the Virtual Appliance.	11:00 AM PST
October 4 | DNA License Planning for Events, APIs, and Integrations with Cisco DNA Center	Join us as our experts walk you through the benefits of Events, APIs, and Integrations. Review best practices related to the planning stage, including design and compatibility requirements.	11:00 AM PST
October 5 | DNA License Transform your spaces with Smart Workspaces	Join us as our experts walk you through the Smart Workspaces solution. This solution leverages information from Meraki, Webex, Catalyst APs, and other sensors to give you a dynamic and real-time picture of your building occupancy, air metrics, and other statistics, all within Cisco Spaces. We will show you how this solution works, what steps you will need to perform to enable it, and the benefits of implementing it within your organization.	11:00 AM PST
October 10 | ThousandEyes Getting Started with ThousandEyes	Join us as our experts provide an overview of the ThousandEyes solution and explore its potential value to your organization. You will learn about ThousandEyes entitlement, licensing, and embedded offerings. Our experts will also show you what ThousandEyes units are used for and how to use the Calculator tool.	11:00 AM PST
October 11 | Cisco DNA WAN Use Case Overview Planning for Multicloud Connectivity	Join us as our experts walk you through Cisco SD-WAN Multicloud Connectivity use case concepts and customer alignment, use case prerequisites, and deployment steps. This session will also include a demonstration of key features.	11:00 AM PST
October 12 | DNA License Moving from Prime Infrastructure to Cisco DNA Center	Join us as our experts walk you through how to plan for the migration of Prime Infrastructure to Cisco DNA Center. Review high-level migration strategies including unique migration features and requirements.	11:00 AM PST
October 17 | Cisco Spaces Best Practices: Digital Signage, Room Booking and Hot Desking	Join us as our experts explain implementation of from Home consisting of secure remote access hardware, and industry leading video and collaboration devices.	11:00 AM PST
October 18 | Cisco DNA WAN Performance Tuning Best Practices for Secure Automated WAN	Join us as our experts walk you through improving performance by tuning the Cisco SD-WAN fabric operations by use case. By the end of this session, participants will be better able to recognize performance issues and apply tuning best practices.	11:00 AM PST

When/What	What to expect	Register here:
October 19 | Cisco Spaces Hybrid Work from Office: A Guide to Success	Join us as our experts provide technical guidance and considerations to ensure success when it comes to your Hybrid Work network, collaboration devices, and building automation solutions in the office.	11:00 AM PST
October 24 | Cisco DNA WAN Expanding to New Use Case- Secure Direct Internet	Join us as our experts walk you through Cisco SD-WAN Secure Direct Internet Access security options and the associated use case. Participants will understand the solution's security stack and licensing and will learn about cloud security through Umbrella and understand how to troubleshoot and verify their operations.	11:00 AM PST
October 25 | Meraki Capability Overview: Meraki Marketplace	Join us as our experts walk you through Meraki Marketplace, a platform that provides a collection of third-party applications and integrations that can be used to extend the functionality of the Meraki platform. Learn about selected third-party applications that can be integrated with your Meraki deployment.	11:00 AM PST
October 26 | DNA Campus Cloud Monitoring for Catalyst Overview	Join us as your experts walk you through the onboarding process for Cloud Monitoring for Catalyst with Meraki Dashboard. Learn about Cloud Monitoring dependencies and prerequisites, and how to get the most out of Cloud Monitoring features.	11:00 AM PST
October 31 | DNA Campus Upgrading your Cisco DNA Center	Join us as our experts walk you through best practices for upgrading Cisco DNA Center, both in an air gapped environment and a standard deployment. Learn how to prepare for the upgrade by completing the upgrade checklist and prerequisites, and review a step-by-step upgrade workflow, as well as post-upgrade verification processes.	11:00 AM PST

When/What	What to expect	Register here:
October 3 | Hyperflex Design Considerations: Cisco Intersight Architecture	Join our experts for a technical overview of Cisco Intersight. Learn how Intersight can help simplify your data center operations while cutting costs and reducing time-to-implement. This session will also cover prerequisites and architecture components of Intersight.	12:30 PM PST
October 4 | Intersight Deployment: Get Started with Cisco Intersight	Join us for an overview of how to get started using Intersight by creating your SaaS account or deploying the virtual appliances and setting up your on-prem deployment.	12:30 PM PST
October 5 | Intersight Get Started with Cisco Intersight Workload Optimizer	Join us as our experts walk you through the initial steps to implement Cisco Intersight Workload Optimizer (IWO). Learn how to enable IWO licenses and claim targets such as VMware vCenter and physical servers. This session will also cover how to control user permissions in IWO based on roles.	12:30 PM PST
October 10| Intersight Cisco Intersight Managed Mode	Learn more about the various Cisco and third-party integrations available for your HX clusters, such as Veeam for backup and business continuity and Cisco ACI for full network policy compliance and management.	12:30 PM PST
October 12 | Intersight Cisco Intersight Managed Mode	Learn how to leverage the Intersight Managed Mode (IMM) to combine the capabilities of the UCS Systems and the cloud-based flexibility of Intersight, unifying the management experience for the standalone and Fabric Interconnect attached systems.	12:30 PM PST
October 17 | Intersight Capability Overview: Cisco Intersight Programmability	Learn how to use the Intersight API through a programmatic interface that uses the REST architecture to provide access to the Intersight Management Information Model.	12:30 PM PST
October 18 | Cloud Compute Capability Overview: Data Protection and Business Continuity	Learn how to improve your data security and business continuity by leveraging HyperFlex capabilities such as data protection. This session will also cover integration with third-party backup solutions.	12:30 PM PST
October 24 | Intersight Day 2 Operations: Cisco Intersight Monitoring	Join us as our experts walk you through best practices to monitor computing infrastructure with Cisco Intersight. This session will cover faults, advisories, HCL, and more.	12:30 PM PST
October 26 | Intersight Expansion Planning: Cisco Intersight Workload and ServiceNow	Join us to learn how to expand the benefits of Cisco Intersight by integrating with ServiceNow.	12:30 PM PST
October 31 | Intersight Cisco Intersight Workload Optimizer and ServiceNow Integration	Learn how to expand the benefits of Cisco Intersight Workload Optimizer (IWO) by integrating with ServiceNow.	12:30 PM PST

When/What	What to expect	Register here:
October 3 | DCNM NXOS Upgrade using NDFC	Join us as our experts share best practices for leveraging Cisco Nexus Dashboard Fabric Controller to perform VXLAN fabric-wide NX-OS upgrades successfully. We will guide you through the upgrade process and show you how software versions can be applied to the new devices as they are added to the fabric.	10:00 AM PST
October 4 | DCNM Multi-Site Domain with NDFC	Join us to learn how to implement Multi-Site between VXLAN EVPN fabrics. Our experts will share best practices and workflows for enabling the recommended designs, Anycast or vPC BGWs, as well as review how to configure the core router for Multi-Site scalability.	10:00 AM PST
October 5 | DCNO Change Management with NDI Delta Analysis	Join us as our experts walk you through how to simplify change management using Delta Analysis to compare the health of the fabric pre- and post-change to rapidly determine whether changes caused any incidents in the network. Delta Analysis can also be utilized for maintenance upgrades, capacity management, and fabric improvement.	10:00 AM PST
October 17 | DCNM VXLAN Fabric Performance Tuning Best Practices	Learn more about common performance issues that may impact VXLAN EVPN fabrics. Our experts will also share best practices to optimize your VXLAN EVPN fabric performance.	10:00 AM PST
October 18 | ACI Cisco ACI Integration with ServiceNow	Join us as our experts walk you through the use cases and benefits that you and your IT team will realize when Cisco ACI is integrated with the ITSM and ITOM solution ServiceNow.	10:00 AM PST
October 19 | ACI Performance Tuning Best Practices Distributed Networking for Cisco ACI	In this session, learn about Cisco ACI Multi-Site and Multi-Pod control plane tuning, as well as data plane tuning. Our experts will help you understand ACI scale and software and hardware support.	10:00 AM PST
October 24 | DCNM VRF-Lite External Connectivity	Join us to learn about the business requirement of connecting VXLAN EVPN fabrics to an external Layer 3 domain. Our experts will demonstrate design options and review how to implement external connectivity using Cisco Nexus Dashboard Fabric Controller.	10:00 AM PST
October 25 | ACI Upgrade Planning and Best Practices for Cisco ACI	Join us as our experts walk you through the ACI upgrade process. The session will cover preparation steps, troubleshooting, and validating the ACI fabric upgrade.	10:00AM PST

| When/What	What to expect	Register here:
October 3 | XDR Getting Started with Cisco XDR	Join our experts to learn how Cisco Extended Detection and Response, or XDR, can help simplify security operations in hybrid, multi-vendor and multi-threat landscapes by prioritizing and remediating security incidents more efficiently through evidence-based automation.	9:30 AM PST
October 4 | SecureX Getting Started with Telemetry	Join us as our experts walk you through the best practices for enabling Cisco product telemetry, and how to take advantage of the telemetry to make informed decisions to help keep your network running smoothly.	9:30 AM PST
October 5 | SecureX Introduction to Data Store	The new release of Secure Network Analytics brings more agility and effectiveness with the Data Store deployment. Join this Ask-The-Experts session to learn all about the Data Store deployment, the value it brings, how to enable it or transition to it, and more!	9:30 AM PST
October 10 | SecureX Introduction to Cisco Telemetry Broker	What is Cisco Telemetry Broker (CTB) all about? And what value does it bring to your Secure Network Analytics (SNA) solution and the rest of your architecture? Join this Ask-The-Experts session to get introduced to CTB and to learn about its benefits, how to enable it or transition to it, and how to use it!	9:30 AM PST
October 11 | DUO Duo Single Sign-On	Join us as our experts walk you through simplifying and streamlining the process of managing access. Single Sign-On (SSO) from Duo provides users with an easy and consistent login experience for any SAML-capable application, whether on-prem or cloud-based.	9:30 AM PST
October 12 | Secure Endpoint Debugging Cisco Secure Endpoint	In this session, review troubleshooting methods for Cisco Secure Endpoint (formerly AMP for Endpoints). Our Cisco experts will provide a thorough demonstration of tools, features, and techniques to resolve the most common issues with the goal of giving your team self-support capabilities. Additionally, you will understand how to effectively collect debugging data in order to use Cisco's Technical Assistance Center (TAC) troubleshooting service if needed.	9:30 AM PST
October 17 | ISE ISE Upgrade	Join us as our experts walk you through the steps to prepare, perform, and validate a successful ISE upgrade without headaches. This session will cover best practices and strategies to minimize downtime, as well as various methods of upgrades for different types of ISE deployments.	9:30 AM PST

When/What	What to expect	Register here:
October 3 | XR Flexible Consumption Model XR FCM - SIA license utilization monitoring	Join our experts to discuss the licenses utilization as it maps to the XR FCM deployment. A practical demonstration will show the related processes and best practices.	10:00 AM PST
October 4 | XR Flexible Consumption Model Cisco Smart Software Manager overview for XR FCM	Join us as our experts demostrate the operation of Cisco Smart Software Manager. Thought live demonstrations, the portal operations on licenses will be shown.	10:00 AM PST
October 5 | XR Flexible Consumption Model How to qualify XR Images	Join us our experts walk you through the process of qualifing a new IOS XR image. Via practical demonstrations our experts will show the necessary steps to take before deciding on the software upgrades.	10:00 AM PST
October 10 | XR Flexible Consumption Model XR FCM - SIA capacity management	Join us as our experts introduce the capacity planning for XR FCM and SIA licenses. A practical demonstration will show how to do the health check of licenses deployment.	10:00 AM PST
October 11 | Customer Digital Experience Monitoring Customer Digital Experience Monitoring Capability Overview	Join us as our experts walk you through Cisco AppDynamics and ThousandEyes integration. This session includes everything you need to know to ensure a successful integration, starting with the features of each product and ending with what you can achieve with the end-to-end visualization of both.	12:30 PM PST
October 19 | Hybrid Application Monitoring Hybrid Application Monitoring Day 2 Operations	Join us as our experts walk you through operational best practices for Cisco AppDynamics. Learn how to manage roles and permissions, gain a better understanding of security management and configuration, and review steps to plan your agents' deployments.	12:30 PM PST
October 25 | Hybrid Application Monitoring Hybrid Application Monitoring Expansion Planning	Join us as our experts walk you through additional use cases for Cisco AppDynamics, including the potential benefits to your organization. Explore AppDynamics integrations with solutions like ITSM and OpenTelemetry and review requirements and implementation guidelines.	12:30 PM PST

When/What	What to expect	Register here:
Fundamental Onboard		
October 5 | SecureX Starting Your Journey with Secure Network Analytics (Portuguese)	Participe desta sessão onde nossos especialistas orientam você através da simplificação do processo de integração inicial para começar a usar o Cisco Secure Network Analytics (SNA). A sessão cobre os primeiros passos para a configuração inicial de Exportadores de Fluxo, Grupos de Hosts e Gerenciamento Básico de Políticas. Também serão abordadas as práticas recomendadas para criar um plano de integração eficaz, identificando integrações, compatibilidades de aplicativos e planejamento de expansão.	4:00 PM BRT
October 11 | Cisco DNA License Day 2 Operations with Events, APIs, and Integrations with Cisco DNA Center (Portuguese)	Participe desta sessão onde nossos especialistas orientam você nas Operações do Dia 2 de Eventos, APIs e Integrações com o Cisco DNA Center. Expanda o básico mergulhando em usos mais avançados e práticos para eventos, APIs e integrações relacionadas a uma infraestrutura ao vivo.	4:00 PM BRT
Intermediate Use Engage		
October 18 | Cisco Spaces Introduction to Engagements and Location Personas with Cisco Spaces (Spanish)	Acompáñenos en esta sesión mientras nuestros expertos lo guían a través de las aplicaciones Engagements y Location Personas. Revise los beneficios para los usuarios finales y los administradores de la red y repase los flujos de trabajo para ambas aplicaciones en un alto nivel.	12:00 PM ART
October 19 | ISE ISE Smart Licensing (Spanish)	Acompáñenos en esta sesión mientras nuestros expertos lo guían a través de los conceptos básicos de Cisco Smart Licensing, que pueden simplificar su experiencia de software al proporcionarle una manera más fácil, rápida y consistente de comprar y administrar licencias en todo el portafolio de Cisco y en toda su organización. Esta sesión destacará los beneficios de Smart Licensing sobre las tradicionales, demostrará la creación de Smart y Virtual accounts, y revisará la posibilidades de licencias en una red air-gapped. Nuestros expertos también describirán los puntos clave relacionados con Smart Licensing con Cisco Identity Services Engine (ISE).	12:00 PM ART
October 19 | ISE ISE Upgrade (Portuguese)	Participe desta sessão onde nossos especialistas orientam você nas etapas para preparar, executar e validar uma atualização bem-sucedida do ISE sem dores de cabeça. Esta sessão abordará as melhores práticas e estratégias para minimizar o tempo de inatividade, bem como vários métodos de atualizações para diferentes tipos de implantações de ISE.	4:00 PM BRT
October 24 | Cloud Networking Flow Telemetry with Nexus Dashboard Insights (Portuguese)	Participe desta sessão onde nossos especialistas exploram como o Nexus Dashboard Insights pode fornecer melhor visibilidade do tráfego de aplicativos e estatísticas de desempenho em sua rede de data center por meio de telemetria de fluxo de hardware. Esta sessão abordará como habilitar a telemetria de fluxo de hardware em tempo real e como usar regras de fluxo personalizadas de acordo com o perfil de tráfego de cada fluxo de aplicativo, garantindo monitoramento e relatórios de fluxo corretos.	4:00 PM BRT
Advanced Adopt		
October 31 | Intersight Cisco Intersight Workload Optimizer Supply Chain and Actions (Spanish)	Conocer cómo Cisco Intersight Workload Optimizer modela su entorno como un mercado de compradores y vendedores vinculados en una cadena de suministro para realizar la gestión de recursos de aplicaciones. Este análisis holístico identifica problemas en su entorno y las acciones que puede tomar para resolver y evitar estos problemas.	12:00 PM ART
