

ZERO TRUST WORKSHOP

Start Your ZT Journey with Confidence

As organizations face the complexity of Zero Trust planning, Red River brings its proven methodology to help customers confidently navigate the journey. Whether organizations are just getting started or refining a more mature model, Red River's workshop process, led by cyber experts, creates a practical plan that is actionable and aligned to mission success.

IT CAN BE OVERWHELMING TO KNOW EXACTLY WHERE TO START.

Red River understands the need to get your Zero Trust program underway, which is why an internal stakeholder workshop is step one. The Red River Zero Trust workshop will help your team have a safe and open space to have discussions and ask questions about how Zero Trust affects your organization.

This two-hour workshop can be conducted in-person, virtually or in a hybrid model and will walk your team through the basics of the goals of Zero Trust: what it is, why it matters, and how to begin your journey. The workshop helps you discuss some of the challenges of establishing a Zero Trust ecosystem, such as the impact of legacy applications and network resources, OT (Operational Technology) and IoT (Internet of Things), administrative tools and protocols, regulations, visibility and control, philosophical and culture shifts, budgeting and more.

Red River tailors each workshop to focus on the unique needs of your team. Whether you are at the beginning of your journey or have completed an assessment and just need help developing a roadmap, Red River can help.

THINK RED

Red River's Zero Trust offerings are designed to work as a comprehensive and scalable cybersecurity strategy, providing support in all aspects of design, execution, and ongoing managed services with the goal of streamlining capabilities and leveraging existing infrastructure wherever possible for every organization.

Red River provides support along every step in the process and expert guidance to help organizations gain confidence.

PARTICIPANTS IN THE RED RIVER ZERO TRUST WORKSHOP WILL LEARN

- What is Zero Trust
- Why Zero Trust is Important
- Cyber Executive Order 14028 & 14144
- Zero Trust Models and Strategy
- Zero Trust Capability Road Map
- Red River's Zero Trust Approach

At the conclusion of the workshop, the Red River team will summarize the main items addressed based on the feedback and engagement from the group. The team will also be available to begin populating the Red River Zero Trust Questionnaire.

HOW CAN THE RED RIVER ZERO TRUST QUESTIONNAIRE HELP ORGANIZATIONS MOVE FORWARD?

The Zero Trust Questionnaire is a collaborative tool that Red River uses to collect information related to the tools, technologies, capabilities, and vendors that make up your organization's ecosystem. The Red River team takes this information and helps your organization identify:

- Which of your existing vendors map to the Zero Trust framework
- Any current gaps in technology
- How to optimize existing or identify new vendors needed to address Zero Trust controls
- The order of priority for addressing each control
- When controls need to be in place and what level of maturity is required to meet federal mandates (for federal agencies and Department of Defense)
