

Built for Missions That Can't Fail.

Invictus, a Red River company, delivers modernization, cybersecurity, intelligence and systems integration for defense, intelligence and federal civilian missions.

As Red River's government services business unit, Invictus combines cleared national security expertise with enterprise engineering, global delivery scale, leading technology partnerships and large-program execution. Together, these capabilities provide the depth, reach and agility to support the government's most complex missions.

Mission Expertise. Global Scale.

Cleared Mission Talent

Professionals with deep experience across classified, highly sensitive and operational environments.

Global Delivery

Teams, operations and program experience supporting missions across the U.S. and around the world.

End-to-End Execution

Full-lifecycle support spanning design, integration, deployment, operations, optimization and sustainment.

Enterprise Scale and Access

An extensive OEM ecosystem, secure supply chain and broad federal contract portfolio, giving customers greater choice, faster procurement and flexible paths to deployment.

Core Capabilities

Enterprise Modernization

Modernizing secure networks, infrastructure and communications to improve performance, availability and resilience.

Cyber

Protecting mission environments through cyber operations, vulnerability research, engineering, cyber governance, next generation defensive posturing, training and readiness.

Intelligence & Mission Support

Advancing mission decisions through intelligence analysis, counterintelligence, operational support and AI-enabled technologies.

Government Technology Systems (GTS)

Delivering complex government programs that integrate infrastructure, services, technology and policy.

Proven Experience Across Government Missions

Red River and Invictus support complex programs across the Department of War, Intelligence Community and federal civilian agencies.

Mission Outcomes in Action

Modernized Classified Networks

Replace aging enterprise network infrastructure while minimizing disruption to users and mission operations.

Accelerated Authorization

Engineered an automated security-scanning toolchain that cut time-to-ATO by 50%, from 6–12 months to 3–6 months, and tripled Security Control Assessment throughput.

Scaled Secure Operations

Staffed 105 positions within 90 days, then surged to 146 personnel supporting 70,000 users across a classified global enterprise.

Protected Fleet Operations

Responded to 49 vulnerabilities across 26 systems and 1,793 Coast Guard assets with zero impact to ongoing fleet operations.

Delivered Navy Cloud Ahead of Schedule

Completed the Navy's first cloud program to achieve RMF accreditation four months early, sustained 99.999%+ availability and identified a billing correction generating more than \$650,000 in annual savings.

Modernized Navy Combat Systems

As prime contractor for the Navy's PEO IWS-X Foundry, Red River is helping deliver a modular shipboard computing platform that accelerates capability deployment, improves fleet readiness and reduces lifecycle costs.

Accelerate your mission.

UNCONQUERED. MISSION-FOCUSED. OUTCOMES-DRIVEN.
